Experience

Senior Frontend Software Engineer

August 2023 – October 2025

Newell Rubbermaid (Contract), Atlanta, GA

- Engineered 30+ accessible UI components for DYMO's design system in C#, Sass, and Bootstrap, reducing redundancy by 40% and accelerating team productivity by 50%
- Incorporated Claude AI and ChatGPT into my workflow, which doubled task completion
- Led UI development of a team of 6 developers for new web application and design system
- Conducted training sessions to educate team members on best practices in accessibility web development
- Converted a large-scale Angular application to C#/Blazor Web app
- Engineered an Angular library for commonly used controls, improving code reuse and efficiency
- Acted as primary liaison with offshore design team 3x weekly, ensuring design alignment and reducing rework cycles

UX/UI Developer

July 2021 – July 2023

Talogy, Remote

- Delivered production-ready Angular prototypes in an Agile environment
- Leveraged UI knowledge to provide feedback to marketing regarding making device-agnostic interfaces
- Led rapid prototyping sessions with R&D, resulting in gamified assessment features that improved user engagement by 20%

UX Designer

September 2019 - November 2020

Jackson & Coker Locum Tenens, Alpharetta, GA

- Directed UX/UI design strategy for a time and expense tracking product overhaul, impacting thousands of users
- Redesigned dashboard, schedule, job board, and login using Adobe XD/Figma, leading to noticeably higher user satisfaction
- Established a scalable and trackable design system, cutting UI build time by 40%
- Evaluated user needs, requirements, and pain points with product owners and developers

Web Developer

May 2016 - August 2019

UPS, Alpharetta, GA

- Developed responsive Angular prototypes for enterprise apps, enhancing usability to millions of customers worldwide
- Resolved 1000+ accessibility and style guide issues, ensuring compliance with WCAG Level AA
- Collaborated daily with product owners, developers, and designers to resolve design issues, accessibility violations, and deliver improved UX suggestions

Key Accomplishments

Newell Rubbermaid

- Conducted competitive product research on SDKs and label printers; findings were adopted by senior leadership for strategic planning.

Talogy

- Developed and presented an in-app color contrast detection solution, receiving recognition from VP-level executives for its impact on user experience for both internal and external customers.

Jackson and Coker

- Increased user adoption and usability by 30% for a time and expense management software through the creation and implementation of a comprehensive UI rebrand

Education

Front End Web Engineering Certificate - Depot U Tech Bootcamp, Birmingham, AL

November 2015

Bachelor of Arts (B.A.): Public Policy Studies - Duke University, Durham, NC

May 2012
